ACD Systems ACDSee 14

ACD Systems is the largest and most respected independent digital image editing and management provider in the world. The company was founded in 1993 in Texas by technology and imaging visionary Doug Vandekerkhove. Doug foresaw the importance of the convergence of analog and digital (print, photos, scans, video and metadata) in the 80's, revolutionizing how analog and digital information was used in pre-Web applications. Today ACD holds seven patents, and millions of ACDSee products are in use throughout the world.

ACD Systems has offices in the United States and Canada, supported by a team of global channel partners. With a product family that includes ACDSee Pro 5, ACDSee Pro Mac, ACDSee 14 photo editing and management solutions, and Canvas technical illustration software, the company serves millions of consumers, small and medium sized businesses, government agencies and educational institutions, and corporate customers.

Representative markets for ACD Systems' products include AEC (architecture, engineering and construction), insurance, manufacturing, aerospace, automotive, government, architecture/construction, education, gaming, technology, bio/health and oil/gas/energy. Customers include General Motors, Caterpillar, Boeing, The New York City Fire Department, NASA, CNN and the Royal Canadian Mounted Police. ACDSee software was used in the making of the movie Titanic because the filmmakers recognized that only ACDSee could provide the illustration, editing and management tools required for their large scale, complex development tasks and image management requirements.

acdsee 14

Go ahead, inspire yourself!

ACDSee 14 has everything you need to take control of your growing photo collection, perfect and add the latest effects to your images, and share your memories with friends and family. Quickly find and organize your photos, create the perfect photo every time with easy-to-use editing tools, and unleash your creativity with super-simple special effects. Then share your images through e-mail, social media or your own personal space on ACDSeeOnline.com.

ACDSee 14 gives dedicated amateur photographers pro-quality tools including:

- New map view and geotagging support –For security reasons photographers can strip out geotagging information automatically added by their camera.
- A new metadata panel that includes custom metadata views for improved control over viewing important data.
- The ability to upload local files conveniently using Sync to Web folders.

Unleash your creativity with ACDSee 14 including everything you need to take control of your growing photo collection.

Features of ACDSee 14:

- **Manage**
Stay on top of your growing photo collection with all the time-saving tools you need in one easy-to-use product. Unlike other photo software, ACDSee 14 doesn't impose a one-size-fits-all system. Manage your photos the way that works best for you, so you stay in control.
- **View**
Spend more time enjoying your photos instead of waiting for them to open. ACDSee's viewing speed is second to none because there is no need to import your photos; ACDSee lets you work with them directly from their original locations. Review your latest shots, browse instant slide shows, and enjoy full-size previews. Any way you look at it, ACDSee works fast.
- **Edit**
ACDSee has everything you need to make your photos look their very best. Go ahead and inspire yourself with easy-to-use, professional caliber editing tools. Your originals are always preserved, so you can go back and start over again anytime. Now that's worry-free editing!
- **Share**
With ACDSee there are so many ways to share your memories. Whether you prefer to print, burn, upload or e-mail, ACDSee 14 makes it easy to inspire friends, family and the world.

Changes in ACDSee 14:

A host of new features make ACDSee 14 the most complete, most powerful photo editing and management solution for home or business. Quickly and easily manage

your growing collection of images, get them looking their absolute best, and share with friends, family and the world.

- **Map view and Geotagging Support**

- Find and organize your photos by location with new Map view and geotagging support. Instantly view the location of images from GPS-enabled cameras, or quickly add location information yourself. Finding, viewing, and selecting images is as easy as zooming in on the map and clicking the marker to select all the photos you shot at that location.

- **Custom Metadata Panel**

- A new metadata panel includes custom views, letting you see only the data that's meaningful and to you.

- **New Special Effects**

- Quickly and easily apply a range of pre-set special effects including:
- New Collage Effect to creatively display your photo in a collage of prints.
- New Orton Effect to give an ethereal, pastel-like touch to your portraits and landscapes.
- New Lomo Effect to produce an edgy, retro feel.
- Choose from more than 20 special effect filters to add some dazzle to your images.

- **Color Labels**

- Color labelling capability takes you to a whole new level of visual tagging and image organization.

- **Do more in the cloud**

- Your free ACDSee Online account is your personal space in the cloud to store, manage and share your images, now including RAW format files. You can now email photo albums, post albums on facebook, and Tweet links to your albums with just a few clicks. Upload local files conveniently using Sync to Web folders to conveniently send your best work to your free ACDSee Online account.

- **Drawing Tools**

- Grab the Pencil tool to draw freehand, or select from lines, curves or shapes to call attention to specific aspects of an image, or add subtle or dramatic drawing effects using the new Drawing tools palette.

What's new in version 14:

- Map view and Geotagging Support. Find and organize your photos by location with new Map view and geotagging support.
- A new metadata panel includes custom views, letting you see only the data that's meaningful and to you.
