## ACD Systems ACDSee 15

ACD Systems is the largest and most respected independent digital image editing and management provider in the world. The company was founded in 1993 in Texas by technology and imaging visionary Doug Vandekerkhove. Doug foresaw the importance of the convergence of analog and digital (print, photos, scans, video and metadata) in the 80's, revolutionizing how analog and digital information was used in pre-Web applications. Today ACD holds seven patents, and millions of ACDSee products are in use throughout the world.

ACD Systems has offices in the United States and Canada, supported by a team of global channel partners. With a product family that includes ACDSee Pro, ACDSee photo editing and management solutions, and Canvas technical illustration software, the company serves millions of consumers, small and medium sized businesses, government agencies and educational institutions, and corporate customers.

Representative markets for ACD Systems' products include AEC (architecture, engineering and construction), insurance, manufacturing, aerospace, automotive, government, architecture/construction, education, gaming, technology, bio/health and oil/gas/energy. Customers include General Motors, Caterpillar, Boeing, The New York City Fire Department, NASA, CNN and the Royal Canadian Mounted Police. ACDSee software was used in the making of the movie Titanic because the filmmakers recognized that only ACDSee could provide the illustration, editing and management tools required for their large scale, complex development tasks and image management requirements.

### Go ahead, inspire yourself!

Organize your collection by what, when or where. Edit and add jaw-dropping effects with ease. Then share your best with friends, family and the world through the ACDSee Online cloud, Facebook, Twitter, and e-mail. So simple to use. Yet such amazing results. Take your photos further than you ever dreamed possible with ACDSee 15.

### Features

Manage your memories

Organize your shots as you get them from your camera. Create categories, add keywords, edit metadata, and rate your photos. Tag images and assign color labels with one click.

### Manage

Make ACDSSee 15 your one-stop center for your growing collection. Manage your shots the way that works best for you and never lose track of another photo again, even if you have thousands on your computer.

### View

Put ACDSSee's legendary viewing speed to work for you, so you can spend more time enjoying your photos instead of waiting for them to open. Check out your latest shots, zoom in on the details, and enjoy full-size, fully dazzling views. Any way you look at it, ACDSSee 15 works fast.

### Edit

Make your best look even better. Experiment with easy-to-use editing tools that deliver amazingly professional results. Your originals are always saved, so you can start over again anytime.

### Share

With ACDSSee there are so many ways to share your memories. Whether you prefer to print, burn, upload or e-mail, ACDSSee 15 makes it easy to inspire friends, family and the world.

## What's New

### Easily brush on edits

Want to soften only a face and not the entire photo? The Edit Brush makes it super easy to apply any editing effect to a specific part of your photo.

Keep track of your ever-growing collection. Polish up even the messiest of photos. Add something magical to an already great shot that's sure to impress. You can do it all, faster and easier than ever before, in ACDSSee 15.

### Hierarchical keywords

Organize your collection with hierarchical keywords that help you sort your photos better than ever before. For instance, let's say you create a keyword tree that looks like this: Events | Local | Birthdays. You can then assign a photo from last week's birthday celebration to the Birthdays keyword with the check of a box, and it implicitly gets added to the higher level keywords too. You can create as many levels as you want, and display all of the photos you've tagged with that keyword in one click. It's sorting, supersized!

### Easily brush on edits

Want to soften only a face and not the entire photo? The Edit Brush makes it super

easy and fast to apply any editing effect to a specific part of your photo. Choose your brush size and the amount of feathering to help you achieve exactly the look you want

### **Blur smartly**

Use the Smart Blur filter to blur areas of little or no detail while still maintaining the sharpness and important details of your photo. Try it as a creative effect or to reduce the noise in your photo for a smoother, less grainy look.

### **Improved noise reduction**

Don't delete those grainy, high ISO photos. Rescue them with ACDSee's improved noise reduction controls for smoother and more natural results, while saving as much edge detail as possible.

### **Improved red eye**

Quickly eliminate pesky red eye, with noticeably better results, thanks to the enhanced red eye reduction tool.

### **Clarity editing tool**

Add a little extra definition or add a soft, dreamy effect. The Clarity tool targets the mid-tones of your photos, without affecting the highlights or shadow areas.

### **Burn to Blu-Ray**

Quickly and easily archive your images to Blu-Ray discs, directly from within ACDSee.

### **Color management**

Photos that are in a color space outside of sRGB are correctly color managed, so what you see on your screen is more true to hue.

## **System Requirements**

### Hardware

- Intel® Pentium® III / AMD Athlon processor or equivalent (Intel® Pentium® 4 / AMD Athlon XP or equivalent recommended)
- 512 MB RAM (1 GB RAM recommended)
- 310 MB free hard drive space (1 GB recommended)
- High Color display adapter at 1024 x 768 resolution (1280 x 1024 recommended)
- CD/DVD Burner - for creating CDs and DVDs

### Software

- Microsoft® Windows® XP with Service Pack 3, Windows Vista®, Windows® 7 or Windows® 8
- Microsoft® Internet Explorer® 7+
- Microsoft® DirectX® 9.0c
- Ghostscript 8.0 - for PDF support
- Windows Media® Player 9.0
