ACD Systems ACDSee 16

ACD Systems is one of the largest and most respected independent digital image editing and management companies in the world. The company was founded in 1993 in Texas by technology and imaging visionary Doug Vandekerkhove. Doug foresaw the importance of the convergence of analog and digital (print, photos, scans, video and metadata) in the 80's, revolutionizing how analog and digital information was used in pre-Web applications. Today ACD holds seven patents, and millions of ACDSee products are in use throughout the world.

ACD Systems has offices in the United States and Canada, supported by a team of global channel partners. With a product family that includes ACDSee Pro 6, ACDSee Pro 2 (Mac), ACDSee 16 photo editing and management solutions, and Canvas technical illustration software, the company serves millions of consumers, small and medium sized businesses, government agencies and educational institutions, and corporate customers.

Representative markets for ACD Systems' products include AEC (architecture, engineering and construction), insurance, manufacturing, aerospace, automotive, government, architecture/construction, education, gaming, technology, bio/health and oil/gas/energy. Customers include General Motors, Caterpillar, Boeing, The New York City Fire Department, NASA, CNN and the Royal Canadian Mounted Police. ACDSee software was used in the making of the movie Titanic because the filmmakers recognized that only ACDSee could provide the illustration, editing and management tools required for their large scale, complex development tasks and image management requirements.

Organize. Perfect. Inspire.

Managing your growing photo collection has never been this easy. And with more ways to edit and perfect your shots like a pro, you will be proud to share your best through the cloud and social media. With ACDSee 16, you will be looking at your photos in a whole new light.

Top Features

With more tools than ever to help you organize your photos, perfect your best, and inspire friends and family, ACDSee 16 is the all-in-one solution for your growing collection.

Organize your way

Create categories, add hierarchical keywords, and rate your photos. Tag images and assign color labels, and bring them all together for further editing or sharing. You can even organize your photos as you import them from your camera or storage device.

Find anything

Find any photo fast. Enter phrases like “ski trip” or “birthday party”, search only specific folders, narrow it down by your camera's file information, or find that one special image with the Quick Search bar. Build detailed searches and save them for ongoing use.

View super fast

Put ACDSsee's legendary speed to work for you. Check out your latest shots, examine details, and enjoy full-size, fully dazzling views. Any way you look at it, ACDSsee 16 means instant viewing gratification.

Easily brush on edits

Want to soften only a face and not the entire photo? The Edit Brush makes it super easy and fast to apply any editing effect to a specific part of your photo. Correct exposure, change the color, adjust details, or add a special effect.

Achieve the best light and color

Rescue photos that are too light or too dark with ACDSsee's patented LCE (Lighting and Contrast Enhancement) technology. Instantly lighten shadows and reduce highlights in one click, or adjust individual sliders to fine tune every aspect.

Share your shots

Photos are meant to be shared. With ACDSsee there are so many ways to make that happen, from social media to e-mail to iPhone and iPad apps. Get ready to inspire friends, family and the world.

Share your photos

Send your photos to your ACDSsee Online space in the cloud, directly from ACDSsee 16. Use your free 10GB to store photos, share with friends and family, and post to Facebook and Twitter.

A worldwide community

Visit the product forums, read our latest blog entries and tweets, and connect with other photographers on our Facebook page. Our global community has something for everyone.

Facebook friendly

Upload photos directly from ACDSsee to your Facebook account, fast. Create a new album or select an existing one, add location and description details, and specify the privacy level.

Get to know your photos

Behind every photo are the technical details. Now you can access key shooting information while managing, viewing, and editing your photos. The new Info Palette conveniently displays a host of data alongside your photo, including white balance, metering mode, exposure program, and whether the flash fired. Plus, see the ISO, f-stop, shutter speed, exposure compensation, focal length, and more, all in one spot, without distracting you from your photos.

EXIF	
Camera Info	
Shutter Speed	1/200 s
F-Number	f/22

Longitude Reference	

Look up locations

ACDSee uses the latitude and longitude information embedded in your photos to lookup the nearest readable address or place name. Simply select a pin on the map, choose "Reverse Geocode" and ACDSee will write the matching location details into the appropriate IPTC fields.

Gradient editing

Apply a gradient to almost any editing effect to subtly progress across your photo. It's especially handy for images that aren't evenly exposed, or that need fine tuning in only select areas.

Boost your bokeh

Attain a realistic bokeh effect with the new Lens Blur filter. Choose the shape and adjust the bokeh frequency and brightness to emulate the pleasing visual artifacts that naturally appear around bright, out-of-focus areas of a photo.

Transform with Tilt-Shift

Simulate the popular Tilt-Shift effect to transform your photo into a miniature-scale model. Rotate the lens plane, adjust the bokeh frequency, brightness, and sides to get the perfect scene.

System Requirements

Hardware

- Intel® Pentium® III / AMD Athlon processor or equivalent (Intel® Pentium® 4 / AMD Athlon XP or equivalent recommended)
- 512 MB RAM (1 GB RAM recommended)
- 310 MB free hard drive space (1 GB recommended)
- High Color display adapter at 1024 x 768 resolution (1280 x 1024 recommended)
- CD/DVD Burner - for creating CDs and DVDs

Software

- Microsoft® Windows® XP with Service Pack 3, Windows Vista®, Windows® 7 or Windows® 8.
- Microsoft® Internet Explorer® 7+
- Microsoft® DirectX® 9.0c
- Ghostscript 8.0 - for PDF support
- Windows Media® Player 9.0
