ACD Systems ACDSee Pro 3 Mac

ACD Systems is one of the largest and most respected independent digital image editing and management companies in the world. The company was founded in 1993 in Texas by technology and imaging visionary Doug Vandekerkhove. Doug foresaw the importance of the convergence of analog and digital (print, photos, scans, video and metadata) in the 80's, revolutionizing how analog and digital information was used in pre-Web applications. Today ACD holds seven patents, and millions of ACDSee products are in use throughout the world.

ACD Systems has offices in the United States and Canada, supported by a team of global channel partners. With a product family that includes ACDSee Pro 6, ACDSee Pro 2 (Mac), ACDSee 16 photo editing and management solutions, and Canvas technical illustration software, the company serves millions of consumers, small and medium sized businesses, government agencies and educational institutions, and corporate customers.

Representative markets for ACD Systems' products include AEC (architecture, engineering and construction), insurance, manufacturing, aerospace, automotive, government, architecture/construction, education, gaming, technology, bio/health and oil/gas/energy. Customers include General Motors, Caterpillar, Boeing, The New York City Fire Department, NASA, CNN and the Royal Canadian Mounted Police. ACDSee software was used in the making of the movie Titanic because the filmmakers recognized that only ACDSee could provide the illustration, editing and management tools required for their large scale, complex development tasks and image management requirements.

Work Smarter. Finish Faster.

Make the most of your time -- and your photos. Fly through every step in your post-production workflow with real-time operation, customizable batch presets, and a powerful RAW processing engine. Perfect your images with patented LCE technology and a full toolkit of non-destructive editing features. Share your best with clients or the world, through the cloud or social media. The all-new ACDSee Pro 3. It's got everything you need, from click to finish.

Overview

Optimized for Retina Display

See what you've been missing. With an extra 5 million pixels, you'll view your photos like you've never viewed them before. And with more details on your screen, you'll edit them more accurately than ever.

Workflow That Flows

Fly through all your post-production tasks, from asset management to RAW processing to publication, with ACDSsee's legendary speed and performance.

Patented LCE

Harness the power of LCE (Lighting & Contrast Enhancement) to improve the quality of poorly lit photos, and achieve stunning HDR photo results from a single image.

Work Smarter

Maximize your time with customizable batch presets that make multi-tasking a breeze.

ACDSsee Online Cloud Storage

Securely store and share your shots on your personal ACDSsee Online cloud space.

Stay in Control

Keep all your digital assets organized. A full suite of management options plus an all-in-one powerful search tool means you'll never lose track of any photo.

What's New

Take your photography workflow to a whole different level with more powerful tools and amazing new ways to appreciate and perfect your images.

Optimized for Retina Display

See what you've been missing. Everything now looks sharper, from icons to text, when you're working on a MacBook Pro with Retina display. But most importantly, the increased pixel density means your high-resolution images will look incredibly vibrant. And the increased level of detail means your editing will be that much more precise.

Find Photos Faster

Scan through your photo library as quickly as you shoot them.

Hierarchical Keywords

Stay on top of your digital assets by creating keyword hierarchies that span from the general to the very specific. Assign a keyword with the check of a box, for example

“Park Guell”, and the image automatically gets added to the higher keyword levels you created, “Europe | Spain | Barcelona.” Click on a keyword in the Properties pane or use Quick Search to display all of the files assigned to that keyword. Create as many levels as you need to fully and accurately classify your assets. And when you export your files, your keywords stay embedded.

Manage

Instant Access

Access your existing collection without waiting. Unlike catalog-based photo applications, you don't need to spend valuable time importing files that are already on your system and connected devices. When you browse a folder on your system, you'll see thumbnails of your photos right away. Plus your external devices are automatically detected, so you can copy images onto your hard drive with drag and drop ease.

Organize from the Get Go

Keep all your digital assets organized from the very start. Quickly and easily import photos from your camera or device, and apply a batch preset as they are imported. Save, backup, rename, resize, change your color space - and get a head start so you can finish faster.

Manage Your Metadata

Organize your collection with the ultimate in flexibility and control. View complete EXIF information captured from your camera, add and edit IPTC fields, and embed your own metadata. Save time by setting EXIF, IPTC and custom information for groups of photos at once, and creating presets for ongoing use. Use custom keyboard shortcuts to add metadata on the fly. Customize the Properties Pane to create a unique metadata view showing only the fields relevant to you.

New Metadata Engine

Save time when managing your metadata. Complete EXIF, IPTC and custom information for groups of photos at once, and create presets for ongoing use.

Stay in Control

Add hierarchical keywords, rate images to keep track of your best work, and set multiple categories without duplicating images.

View

- **Take a Closer Look. And Be Amazed.**

Optimized for Retina display, ACDSee Pro 3 takes advantage of every extra pixel in the high-resolution screen so your photos come to life with vibrant colours and sharper details.

- **Focus on Your Photos**

Review your images one by one at full screen. Examine details with pan and zoom, and get down to the pixel level on specific areas using the Selection tool. Any way you look at it, Pro puts the focus on your photos.

- **Navigate Your Collection**

Power your way through a large group of images in real-time using the filmstrip viewer.

- **Present Slideshows**

Present your photos in a clean, stunning full-screen slideshow view, and mirror it to your Apple TV for easy sharing with an audience or client. Mix in a host of creative transitions or keep it simple with a fade.

- **Organize on the Fly**

Categorize, rate, rename, rotate, copy or move your files as you're viewing them. Plus tag or add color labels to identify further processing.

System Requirements

Hardware

- Mac computer with an Intel® processor
- 1GB RAM minimum, 2 GB recommended
- 100 MB free hard drive space for installation

Software

- Requires Mac OS X 10.7, 10.8
