Acronis Backup for VMware

Acronis is a global provider of leading backup, disaster recovery, and secure file sharing and file access solutions. Founded in 2002 Acronis has established itself as a fast-growing international company with more than 700 employees in 18 countries and partners in almost every country in the world. Acronis provides complete, efficient and reliable backup solutions for desktop, server, virtual and cloud environments as well as leading file sharing and sync solutions for mobile devices.

Acronis knows backup. The proof is in the more than 50 advanced backup and recovery technologies developed to date. Over 4.5 million consumers, small and medium businesses and service providers employ Acronis products to protect their critical data.

The company's flagship product Acronis Backup delivers sophisticated technology solutions packaged in an easy-to-use way that allows smaller companies to address their new enterprise-level requirements. Enterprises also use Acronis solutions to address their point disaster recovery, migration and end-point backup needs.

Acronis® Backup
for VMware

New generation VMware® backup and recovery
software

Acronis Backup for VMware is our all-in-one, easy-to-use solution for protecting your VMware vSphere® environment.

Not sure what to back up? Let us take care of it! This product integrates Acronis' patented disk imaging technology with VMware's VADP interface to capture your entire setup in one easy step.

When disaster strikes, Acronis will help you recover what you need—to any location you want—in minutes. With one simple click, you can restore files, application data, an entire VM, or your complete ESXi™ environment! We also offer the flexibility of restoring data to its original location, or to an entirely new one (even a completely different hypervisor platform).

Key Features

Specialized VMware Backups

Acronis Backup for VMware provides deep integration with VMware vStorage APIs to balance backups within an ESXi environment. We also use CBT to reduce the volume of backup data, ensuring that your VM backups are always fast and successful.

vCenter Integration

With full vCenter integration, Acronis can leverage the VMware API to identify all the VMs on your ESXi server. You can select all VMs, groups of VMs, or individual VMs for backup. You can also find and recover individual VMs as quickly as possible.

Agentless VM Backups

Acronis agentless backups eliminate the need to install an agent on every VM, reducing resource usage and management complexity.

Efficient Incremental Backups

Incremental backups identify only the changes made since the last backup, significantly reducing backup time and any impact on network bandwidth or backup storage.

Run a VM from a Backup

Mount and boot a VM directly from a backup in minutes! Acronis allows you to recover any server as a VM, or boot a backup as a VM for development/testing. Simply save any changes made to the VM as a new backup.

Rapid Recovery

Recover VMs 100 times faster by only restoring blocks that have changed since the backup.

Recover Applications

Recover an entire Microsoft® Exchange Server, SQL Server®, SharePoint® or Active Directory® database. You can also recover specific application items (such as individual mailboxes, emails, or documents).

Requirements

Storage media

- Hard disk drives and storage arrays (P-ATA (IDE), S-ATA, SCSI, iSCSI, FC)

NAS (SMB and FTP)

- Acronis Cloud Storage

Supported operating systems

- Windows XP Professional SP2 (x64), SP3 (x86)
- Windows Server 2003, 2003 R2 - the Standard, Enterprise, Small Business Server editions (x86, x64)
- Windows Vista - all editions (x86, x64)
- Windows 7 - all editions (x86, x64)
- Windows 8, 8.1
- Windows Server 2008 - the Standard, Enterprise, Foundation editions (x86, x64)
- Windows Small Business Server 2008
- Windows Server 2008 R2 - the Standard, Enterprise, Datacenter, Foundation editions
- Windows Small Business Server 2011
- Windows Server 2012, 2012 R2

Supported vSphere environments

- VMware vSphere (Virtual Infrastructure)
- Server types: ESX and ESXi
- Versions: 4.0*, 4.1, 5.0, 5.1, 5.5
- Editions/Licenses
- VMware vSphere Standard (Hot-add backup mode is supported on vSphere 5.0+ only)
- VMware vSphere Advanced
- VMware vSphere Enterprise
- VMware vSphere Enterprise Plus
- VMware vSphere Essentials (Hot-add backup mode is supported on vSphere 5.0+ only)
- VMware vSphere Essentials Plus (Hot-add backup mode is supported on vSphere 5.0+ only)
- VMware vSphere Hypervisor (Free ESXi) is NOT supported
- (*) ESX(i) version 4.0 environment is supported with exceptions, for example, Exchange Server Backup Extraction and ESXi configuration backup features are not supported
