## NovaStor NovaBACKUP 20

Certified  
Partner

## NovaBACKUP is the #1 Backup and Cloud Storage Solution for Professional Offices

For more than a decade, we have been committed to providing all-inclusive and powerful cloud-based data protection to thousands of MSPs and professional offices around the globe.

We are industry leaders in Backup and Disaster Recovery, with vast experience in helping specialized industries reach the strictest data protection goals. Our job it to make data protection as simple and reliable for you as possible.

From initial contact, to ongoing operations, our backup experts will be there to support you. We take a people-first approach to backup. That means that you can count on us to provide you with the support you need to resolve your data protection concerns.

### Our service promise

Our team of US-based backup experts have decades of experience launching thousands of successful backup services for managed service providers and professional offices.

We treat the protection and safety of your data like we do our own. Feel free to reach out to our team if you need assistance building your Backup and Disaster Recovery plan.

### Our goals

- To make backup easier, with high-performance software and professional support you can rely on.
- To share our industry expertise with partners and clients and educate them on the best data protection practices.
- To deliver compliant, hardware & storage-neutral software solutions that meet the needs of our customers and partners.
- To provide software that is distinguished by its quality, stability, and performance.

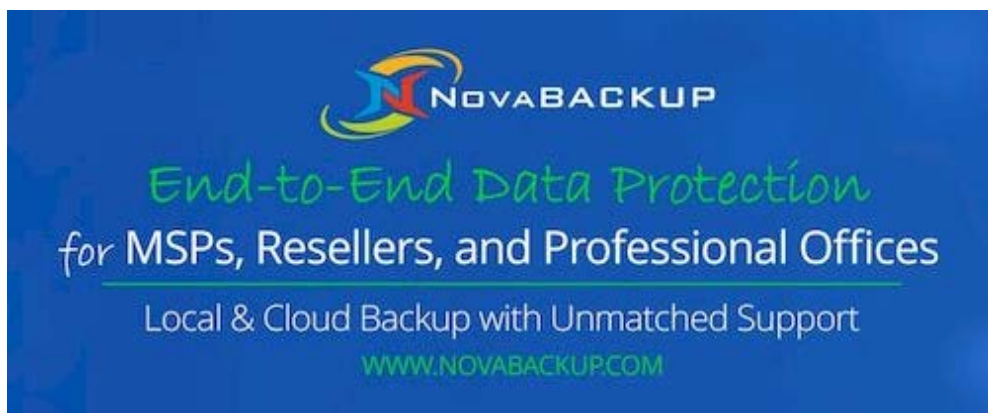

### Our value proposition

NovaBACKUP combines products and services delivered by experts who position and assist our customers and partners to achieve ongoing success with their data protection strategies.

- US-Based: Product developed and supported from California, USA

- Service: Expert availability through entire relationship lifecycle
- Competence: Decades of in-house data protection expertise
- Pragmatism: Addressing pain points efficiently and economically
- Experience: More than 1 million machines are protected by NovaBACKUP
- Responsibility: Delivering on what we promise
- Reliability: You can rely on NovaBACKUP to keep your data safe

## Fyysisten ja virtuaalisten järjestelmien varmuuskopiointi ja palautus pienille ja keskisuurille yrityksille

### Miksi NovaBACKUP?

#### Ratkaisu kaikkiin tarpeisiin

Etsitkö luotettavaa, nopeaa, käyttäjäystävällistä ja kustannustehokasta varmuuskopiointiratkaisua Windows-järjestelmille?

Palkittu tietosuojajohjelmistomme tarjoaa tiedostojen ja kuvien varmuuskopiot, automaation, keskitetyn valvonnan, yksittäisten postilaatikoiden palautuksen, paikallisen ja pilvitalennustilan, virtuaalikoneen replikoinnin ja paljon muuta.

Koko järjestelmä voidaan varmuuskopioida laajalla katastrofipalautuksella – helppo palautus eri laitteilla (yleinen palautus) on mahdollista.

### Kaikki mitä tarvitset varmuuskopiointiin ja palautukseen

NovaBACKUP tarjoaa huippuluokan varmuuskopiointiin ja palautuksen - virtuaalisten ja fyysisten ympäristöjen varmuuskopion, inkrementaalisen, differentiaalisen ja järjestelmävarmuuskopion, vahvistuksen tai salauksen kanssa tai ilman.

- NovaBACKUP on nopea ja helppo asentaa.
- NovaBACKUP on turvallinen ja luotettava 256-bittisen AES-salauksen ansiosta.
- NovaBACKUP on paras puolustus.
- Palauta kriittiset tietosi nopeasti lunnaiden, laitteistovikojen, katastrofien tai muiden uhkien sattuessa.

Tiimillämme on vuosikymmenten kokemus tietosuojan maailmasta ja se auttaa asiakkaitamme kehittämään parhaan varmuuskopiointi- ja katastrofipalautusstrategian ympäristöönsä.

### Turvallisuus

- Salattu, turvallinen ja GDPR-yhteensopiva
- Varmuuskopiointiohjelmistomme Windowsille suojaa tietosi sotilasluokan 256-bittisellä AES-salauksella.
- Lisäksi NovaBACKUPin ja hätäapuoppaan avulla voit täyttää kaikki alasi GDPR-, HIPAA-, FERPA-, GLBA- ja muut tietosuojavaatimukset.

**Testaa itse!**

## Recent Updates for NovaBACKUP 20.1

The new NovaBACKUP release changes everything about data protection for you and your customers: A significant increase in backup and restore speed to the cloud, enhanced central management, and new features that simplify everyday backups and restores. NovaBACKUP takes a giant step forward, simply and reliably securing data to the storage location of your choice conveniently administered from wherever you are.

### New Data Mover Engine

The NEW NovaBACKUP Data Mover Engine is the core of NovaBACKUP. It leverages the latest streaming technologies and compression algorithms to speed up the backup of files and systems to and from the cloud, leading to a backup strategy that allows for near-zero continuous data protection.

Drastically increase the number of backup jobs to the NovaBACKUP Cloud and increase backup data loads with minimal impact to system resources – an up to 7x backup to cloud speed improvement compared to older versions of NovaBACKUP.

Lightening fast transfer to and from the cloud helps achieve near-continuous data protection, and with that incredibly short Restore times (RPO and RTO) for minimal disruption to productivity.

## Central Management

NovaBACKUP Central Management is growing up and now enables users to remotely access all the information they require to understand the status of backup data, make any necessary adjustments, and create new backup schedules with ease.

Monitor the backup status of all connected agents and access important insights – from a high level down to the granular details.

Create and update backup jobs without the need to be on-site, thus increasing your reach and empowering your own managed backup services.

Reduce your administrative workload by integrating Central Management functionality into, for example, your own RMM using the now available open RESTful APIs.

## Disaster Recovery Images

Local image backups for Disaster Recovery are more efficient than ever and they take up less space. They are now set up in one single step.

Other new feature options like incremental or differential backups to VHD/VHDx make a system images even easier to work with.

## Cloud Backup

The NovaBACKUP Cloud keeps growing with data centers in the USA, Canada, and now Germany. For Managed Service Providers and IT departments that want to centrally manage their local and cloud backups, there's now an option to achieve backup immutability, preventing backups from being hijacked and encrypted, for example, due to a ransomware attack.

By adding an additional S3-compatible device as a cloud destination to our NovaBACKUP PC, Server, and Business Essentials versions, you now have greater flexibility for adding cloud storage to your backup and recovery strategy. Utilizing the new NovaBACKUP Data Mover Engine, backups and restores from S3 devices leverage the same speed improvements.

## And There's More!

Support for SaaS-based applications like Microsoft 365 to protect emails, Teams, SharePoint, and more with optional mailbox backup or archive.

A new Partner Management Center gives IT providers better visibility into active and even legacy product licenses, adding convenience and functionality to properly manage your customer's license assets.

A simple, usage-based pricing model differentiates NovaBACKUP software, while US- and German-based support provides a highly personalized experience unmatched in the industry.
