StudioCoast vMix 26

vMix is a powerful software solution for creating professional live video productions on your PC. Anyone can create awesome live shows with vMix! Whether you want to live stream from your garage or produce a multi-camera HD concert that's streamed to millions, vMix is for you. It allows you to create professional video productions at a fraction of the cost of traditional broadcast options.

PRODUCE, STREAM & RECORD WITH VMIX

vMix is live streaming and production software that allows you to create professional quality productions on your own computer. vMix gives you the power to add multiple cameras, videos, NDI sources, remote guests using vMix Call, images, audio, web streams, Powerpoint, titles, virtual sets, chroma key, and much more to your production. You are then able to display, record and live stream your production all at the same time!

Production large or small? vMix does it all!

vMix can be used in large scale multi-camera events or simple one person webcam productions. Whether you're producing network TV, online talk shows, Church services, esports tournaments or perhaps just sharing your thoughts live to your YouTube channel... vMix is a great option! You can use vMix to power your entire your production or just use certain features to elevate your existing workflow.

vMix is a Software Video Mixer and Switcher that utilises the latest advances in computer hardware to provide live HD video mixing, a task previously only possible on expensive dedicated hardware mixers.

vMix also functions as **live streaming software** that allows you to publish your live productions directly to the Internet!.

vMix runs on the Windows 10 platform.

vMix is a complete live video production software solution with features including LIVE mixing, switching, recording and LIVE streaming of SD, full HD and 4K video sources including cameras, video files, DVDs, images, Powerpoint and much much more.

As vMix is a software solution, we've enabled users to build their own custom computers at a fraction of the cost of traditional live production equipment. We have created **vMix Reference Systems** that will allow you to build a vMix PC with specifications to match your production needs. We also have a list of available system builders that can create a system for you!

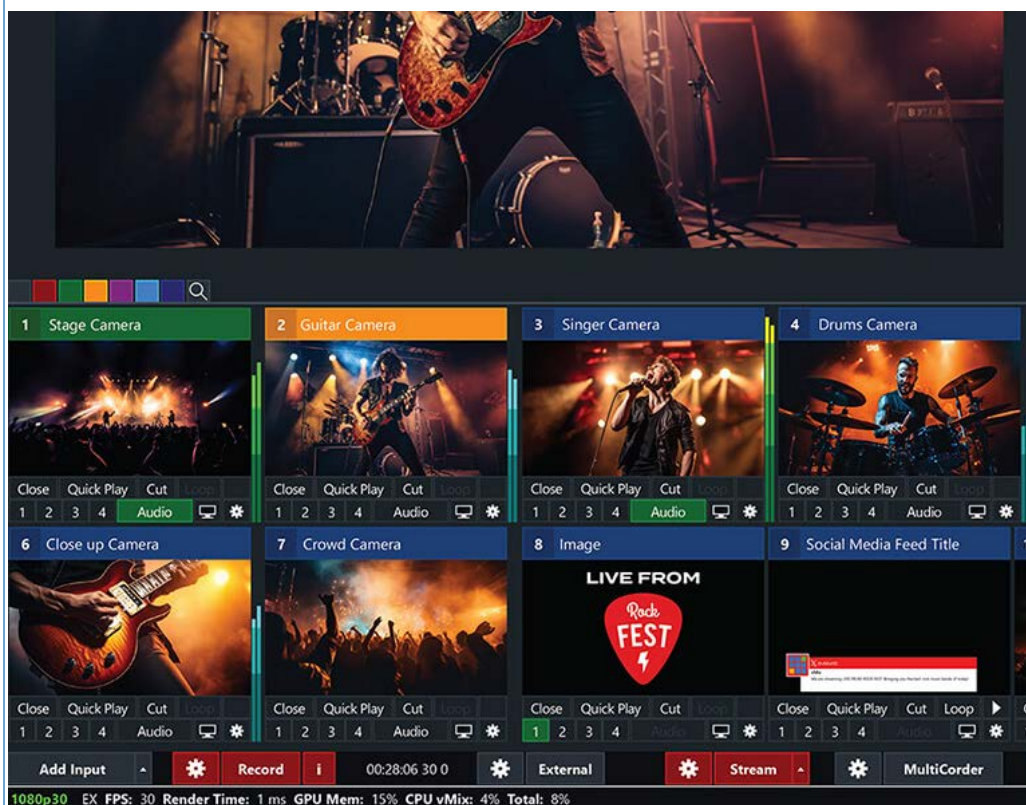

Whether you are looking to produce big budget live concert productions, sporting events, Church services or small webcasts, then vMix is for you. Check out our **Solutions page** to see how vMix can fit into your workflow.

For a full list of what is possible with vMix view our **features page**.

Download a trial today and use a **fully functional version of vMix for 60 days free of charge**.

[Lue lisää](#)

All your inputs in one place

- Video Cameras: 4K, HD and SD capable. Support for Webcams and capture cards. See [Supported Hardware](#).
- NDI®: Send and receive high quality, low latency video and audio on the local network between vMix systems and any NDI compatible sources. See [NDI](#).
- Video Files: Support for all popular formats including AVI, MP4, H264, MPEG-2, WMV, MOV and MXF.
- DVDs: With menu navigation.
- Audio Files: MP3 and WAV.
- Audio Devices: Mix multiple audio sources such as SoundCards, ASIO Audio Interfaces and capture card audio.
- Video and Audio PlayLists: Combine multiple video and/or audio files into a single Input
- Web Browser, RTSP, PowerPoint, Photos, Solid Colour and more.

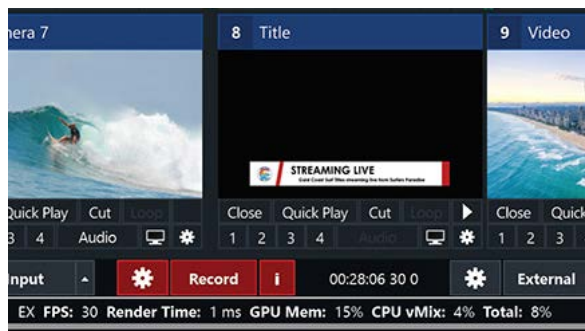

Simultaneous Streaming, Recording, and Output

- Live stream to your favourite streaming providers including Facebook Live, YouTube, Twitch and Ustream.
- Live Record in full HD to AVI, MP4, MPEG-2 or WMV
- Output via AJA, Blackmagic and Bluefish cards to professional recording decks and monitors
- Virtual Camera support for streaming out to 3rd party software such as Skype, Zoom, Google Hangouts and VLC.

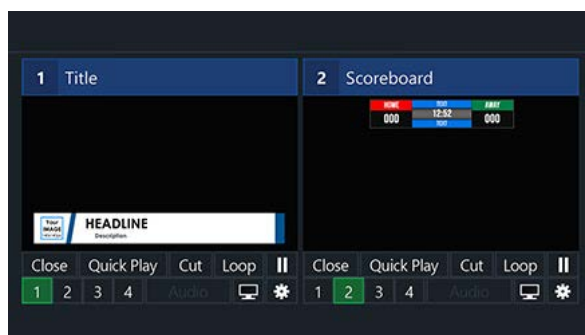

13 Transition Effects

- Cut, Fade, Zoom, Wipe, Slide, Fly, CrossZoom, FlyRotate, Cube, CubeZoom, Vertical Wipe, Vertical Slide and Merge transitions available with 4 customisable transition buttons for easy access to your favourite effects.

Professional HD production on a modest PC

- vMix is the most efficient live production software on the market thanks to full 3D acceleration.
- Create productions with multiple HD sources without breaking the bank or your CPU.

Easy to use, high-performance, animated graphics

- Choose from 100+ built-in animated titles, scoreboards and tickers.
- **GT Designer Standard** Create custom static titles and animated tickers (all editions)
- **GT Designer Advanced** Create custom animated titles and import layers from Adobe Photoshop PSD (vMix 4K and Pro)

HD Virtual Sets with high quality real-time Chroma Key

- Built In Virtual Sets - Or build your own.
- Full Motion Zoom - Customisable camera position presets.
- High Quality Chroma Key - Use with or without virtual sets to suit your production needs.
- Available in all editions

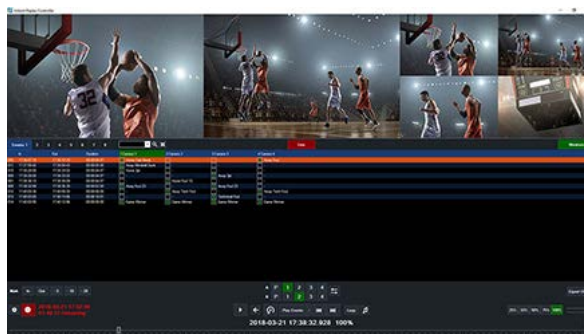

PC and Mac Desktop Sources

- Utilise screen capture from remote desktops running on your network. Great for PowerPoint and Skype.
- Audio Capture support also available.

vMix Call: Add up to 8 remote guests quickly and easily

- The easiest way to add guests to your live show is built right into vMix HD, 4K and Pro editions. vMix Call allows anybody with a browser and webcam to become an instant guest!
- See [vMix Call](#).

Instant Replay

- Full eight camera slow motion instant replay available in [vMix Replay](#).
- Create replay events on the fly with traditional Mark In a Mark Out buttons or use the time saving 5, 10 and 20 second button

presets.

- Create highlight reels from multiple events and watch all the action unfold with built in transitions and optional background music.
- vMix Replay works with an extensive array of control options. See the [vMix Replay](#) page for more info.

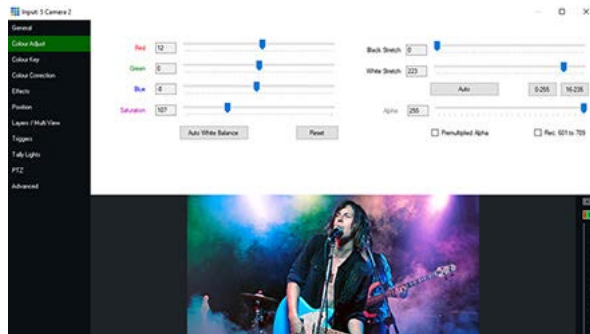

Web Browser Input

- Display a website directly in vMix.
- Full use of mouse and the ability to scroll pages.
- Natively supports browser audio and HTML 5 video playback!
- No need for an additional computer just to bring in a browser, do it all through vMix!

Built-In Audio Mixer

- Audio Mixer allows you to easily keep track of all audio sources and includes the ability to Mute, Follow (Auto Mixing) and Delay any source.
- A VU Meter is also included with a peaking display to ensure each inputs level is broadcast ready.
- Fine tune every audio source with built in EQ, Compressor and Noise Gate effects.

Live Video Effects

- Colour Correct, Deinterlace, Sharpen, Zoom, Rotate, Pan and Crop any input in real time.
- All effects are processed in 4:4:4 32bit colour space for optimal video quality.

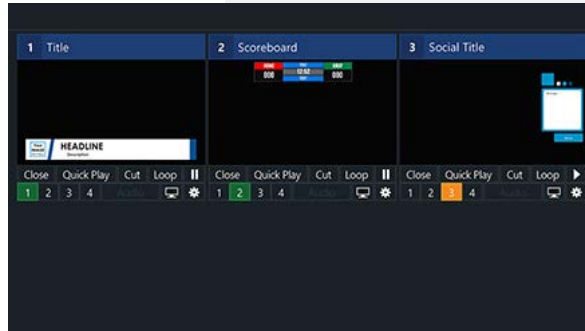

Layers / Input MultiView

- Combine multiple inputs together as Layers using the different "MultiView" presets or customise the position of each element

with the available Zoom, Pan, Rotate and Crop controls.

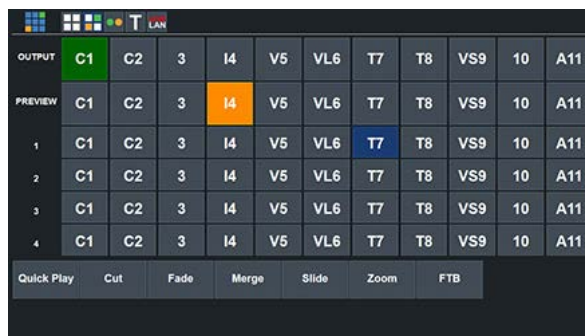

Full NDI Capabilities

- vMix allows you to send **and** receive NDI sources to any other NDI compatible device.
- Use NDI to transmit your output, cameras, audio and graphics across your local network.
- Connect vMix to your favourite NDI program or device such as Caspar CG, NewBlue Titler, Adobe CC and many more.

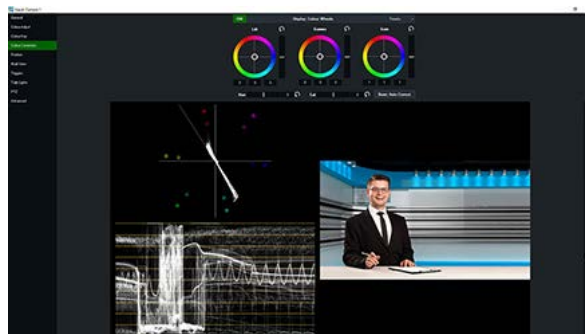

4 Overlay Channels

- vMix includes 4 Overlay Channels in addition to the Multi View feature. Each overlay channel can have its own transition effect, position and border.

Touch Screen Web Interface

- Control vMix remotely using the **vMix Web Controller** on your Surface, iPad, iPhone, Android or other touch screen device using the built in web interface.
- Customisable shortcut buttons can also be created to activate common production scenarios.

Professional Colour Correction & Monitoring Tools

- Professional colour correction on every input
- Lift/Gamma/Gain/Hue/Saturation controls with industry standard colour wheels and bars
- Import/export colour correction presets to use in other productions
- New Waveform and Vectorscope monitors in Preview and Input settings windows
- Select the RGB icon to select from the various display options
- Choose from Waveform RGB, Waveform Y, Parade RGB, Vectorscope and split (side by side) layout options

SRT In and Out Support

- SRT - Secure Reliable Transport is a point to point protocol for fixed latency streams over an unreliable internet.

- vMix supports multiple inputs (Stream Input) and up to 4 outputs in vMix 4K and Pro (1 output in all other editions).
- Uses GPU acceleration where possible for H264 and HEVC streams. 2 stream PC encode limit applies on GeForce cards, CPU fallback available where not available on the GPU.

SRTALLIANCE
SECURE RELIABLE TRANSPORT
