Veritas Backup Exec 22

VERITAS™

BE Sure. BE Protected. BE Cloud.

Veritas Technologies empowers businesses of all sizes to discover the truth in information—their most important digital asset. Using the Veritas platform, customers can accelerate their digital transformation and solve pressing IT and business challenges including multi-cloud data management, data protection, storage optimization, compliance readiness and workload portability—with no cloud vendor lock-in. Ninety-seven percent of Fortune 100 companies rely on Veritas today to reveal data insights that drive competitive advantage.

**Veritas
Backup Exec™****Veritas Backup Exec 22**

Data backup and recovery for small to midsize businesses.

Protect your data wherever it lives - physical, virtual, and cloud.

As a business owner/operator, you have to take on a lot of jobs. Data backup and

recovery shouldn't be one of them. With Backup Exec, you get a simple, powerful solution that ensures your business-critical data is never at risk of being lost, stolen, or corrupted. And as your data management needs grow, Backup Exec seamlessly scales to meet them—providing confidence and cost-savings over the long term.

Backup Exec is trusted by over 45,000 businesses worldwide.

Eliminate the need for multiple point products and strengthen your resilience.

- **Simple**
Quickly track and monitor all backup and recovery activity through an easy-to-use interface.
- **Secure**
Layer security access with two-factor authentication and prevent malicious code injection.
- **Unified**
Seamlessly protect VMware, Microsoft, and Linux platforms from the same user console.

Microsoft 365 Protection

- Exchange and OneDrive protection and recovery
- Complete integration with Backup Exec
- Own protection of your Microsoft 365 data

Security and compliance

- Protects your backup data from ransomware attacks
- Ensures data is compliant in every location
- Ensure your data is compliant with GDPR Guard
- Securely stores credit card transaction data

Cloud data protection

- Deployable marketplace templates for both AWS and Azure
- Certified cloud connectors for all major cloud vendors
- Support for all AWS cloud storage tiers
- Optimized storage costs and bandwidth with in-line deduplication

Virtual workload protection

- Forever incremental VM backups with Backup Exec Accelerator
- Extended hyperconverged environment support
- Automated discovery and protection of new VMs
- Instant recovery of VMs

Smart integrations

- Consolidated reporting of your entire data ecosystem via Veritas Usage Insights
- Protects SaaS workloads and applications including Microsoft 365, Google Cloud and Salesforce with NetBackup SaaS Protection
- Integration with Azure Site Recovery for instant cloud-based disaster recovery

Protect all your data, not just some of it

If the unthinkable happens, be confident all your critical data is backed up and can be recovered quickly and easily.

- Reduce vulnerability and exposure to the threat of ransomware.
- Use automated workflows to remain compliant with data protection regulations like GDPR.
- Schedule and monitor backup jobs. Recover data in a few simple clicks using intelligent dashboards and intuitive wizards.

Backup for the modern business

Modernized data protection enables you to keep pace and respond to the growing demands of digital transformation.

- Back up to any storage device or the cloud environments identified on our comprehensive software, cloud and hardware compatibility lists.
- Accelerate your cloud journey with native cloud connectors for all major cloud vendors including AWS, Microsoft Azure, IBM, and Google.
- Stay current and benefit from latest technology releases with a choice of subscription licensing options.

Simple to acquire, less expensive to run

There's no need to pay for and manage multiple solutions. Backup Exec provides unified protection for all your data across virtual, physical and multi-cloud environments.

- A simple, plane of glass interface cuts down admin time. to makes initial installation and configuration up to 75 percent faster*.
- Spend less on storage and reduce backup times using intelligent deduplication and multi-cloud capabilities.
- Benefit from 59 percent lower 5-Year Total Cost of Ownership

What's New in Backup Exec 22

The new BE Simple subscription licensing program is easy to understand, simple to adjust to your data protection needs, and includes all product functionality – including Microsoft 365 protection! That's right, protection and recovery of M365 Exchange and OneDrive data has now been fully integrated into Backup Exec. No need for a separate bolt-on product for M365 protection, its included with BE 22.

Support for Microsoft 365 - Backup Exec enables you to backup and restore Microsoft 365 data. The following workloads are supported:

- Exchange Online
- OneDrive

Backup Exec Simple-Subscription Licensing - BE Simple consolidates all licenses into a single edition that includes all features and adds the new Microsoft 365 feature. The following licenses are introduced:

- Backup Exec Simple Core Pack
- Backup Exec Simple Add On

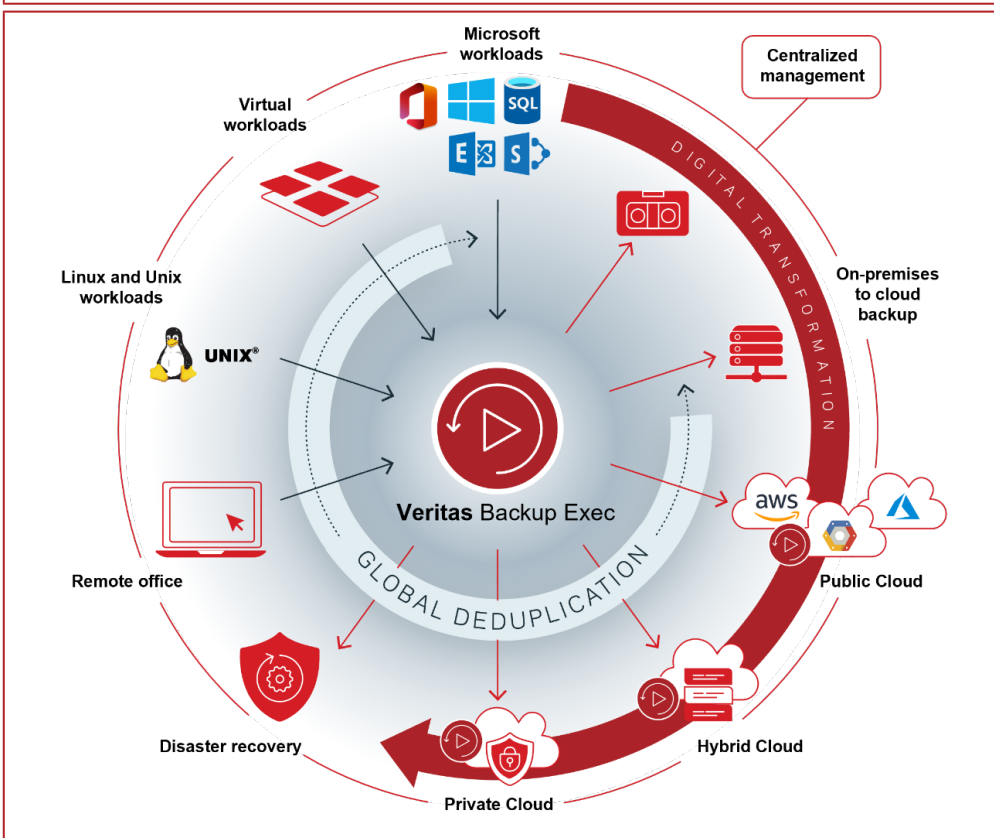

The subscription metering is instance-based. One instance is a virtual machine or physical machine or 10 Microsoft 365 users.

64-bit SQL Express Database - Backup Exec now uses a 64-bit SQL Express 2017 instance to host its database. It helps to get increased performance and make optimum usage of a 64-bit server.

Support for new cloud storage regions - Backup Exec users benefit from cloud storage choices through support for the following cloud storage regions, enabling greater flexibility and economy.

Generic S3 cloud provider support with Backup Exec cloud deduplication – Further enhancing our market leading deduplication capabilities, Backup Exec now supports cloud deduplication for the generic S3 cloud providers.

S3-compatible cloud storage with V4 authentication - Backup Exec now supports configuring of S3-compatible cloud storage with V4 authentication in Backup Exec. You can send the region information that enables storage to support V4 compatible cloud providers.

Why Backup Exec?

Protect data to, from, and within clouds.
Backup that confidently serves your cloud strategy.

Backup Exec provides greater flexibility to help you reduce costs and administration time, including the power to choose long-term, low-cost compute and storage in the cloud.

- Benefit from direct integration with Azure Site Recovery for cloud-based DRaaS, minimizing RPO and RTO.
- Use direct public cloud connectors to AWS, Azure, and Google Cloud Storage.
- Choose flexible hybrid-cloud gateway options from AWS, Microsoft, and NetApp.
- Run Backup Exec in the cloud on AWS EC2 or the Azure platform.
- Simplify your cloud data protection implementation with easy deployment from the Azure and AWS Marketplace.
- Optimize costs with hot and cool storage support.

Designed for your VM infrastructure.
Get deep VMware and Hyper-V integration.

Backup Exec integrates with leading hypervisors to provide real protection for all your virtual environments, including VMware® and Microsoft Hyper-V®. Years of API integration experience and support for the latest platforms ensure your virtual machines are always protected quickly, with reliable restore.

- Protect one to thousands of virtual machines from a single console.
- Automate the discovery and protection of all your virtual machines
- Instantly recover virtual machines and give users access in minutes
- Restore VM objects directly from agentless backups and hardware snapshots
- Automatically discover and protect VMs on VMware vSANs and vVOLS

Certified solutions that work.

Confidently support your backup infrastructure.

Over 30 years of experience has taught us what works and what doesn't. Our team of engineers constantly certifies Backup Exec with the latest hardware and software. That means you can rely on Veritas' compatibility expertise for fast and reliable infrastructure.

- Enjoy physical support from one of the industry's most comprehensive hardware and software compatibility lists.
- Use solutions we test and certify, so you don't have to.
- Get support for new applications and platforms within 60 days of release.

Optional add-ons to extend protection and functionality.

Locate, harness and protect your data, not just some of it.

Now when you choose Backup Exec, you can connect with an ever-expanding family of solutions that can help you to run your business with confidence.

- Backup Exec now brings you full integration with Azure Site Recovery for instant cloud-based disaster recovery to Azure.
- Veritas SaaS Backup extends backup for Office 365, Google Cloud G Suite, and Salesforce and other SaaS applications.
- Veritas Desktop and Laptop Option (DLO) protects all your company endpoint devices that run the following platforms, Windows, Mac, iOS and Android.
- Veritas Access allows you to easily manage access to data to meet performance and capacity demands of individual workloads.

Optimize delivery to the consumer.

Use Backup Exec the way you want.

In a world filled with many choices, Backup Exec gives you the flexibility to purchase and consume according to your backup strategy. On-prem? Storage-as-a-Service? MSP-delivered Backup-as-a-Service? It's all possible with Backup Exec.

- Easily manage compliance with capacity licensing.
- Get turnkey operation with reseller-delivered appliances.
- Use public cloud storage via connectors and hybrid gateways.
- Have the experts manage your Backup Exec on-premises or in a private cloud.

VERITAS

Veritas Backup Exec -lisensointi muuttuu

Backup Exec perpetual -lisenssien myynti päättyy 31.3.2023.

Jatkossa on vain yksi lisenssimalli – Backup Exec Simple, joka sisältää kaikki Backup Exec ominaisuudet, sekä Microsoft 365 käyttäjien varmistuksen.

HUOM! Vanhat perpetual-lisenssit ja uudet BE Simple-lisenssit eivät ole yhteensopivia samassa ympäristössä.

Veritas Backup Exec on kustannustehokas ja kokonaisvaltainen ratkaisu tiedon varmistukseen.

- Virtuaalisten-, fyysisten-, ja pilviympäristöjen varmistus.
- AWS, Azure, Google cloud storage -tuki.
- M365 varmistus, sis. Exchange ja OneDrive.
- Suojaus Ransomware-hyökkäyksiä vastaan.
